SafeBoarder's patented and innovative Personal Injury Protection system "L" Force Geometry, uses the existing hydraulics of the host machine and provides the user with a much safer access system when lowered and a more rigid access system when retracted.

### Here's what one of our happy customers has to say about SafeBoarder.

At Kalgoorlie's Superpit in Western Australia operated by KCGM we've fitted the SafeBoarder Retractable Access Systems to our entire fleet, comprising of the following: 40 x Caterpillar 793C & F trucks, 2 x Caterpillar 854K Wheel Dozers, 4 x Caterpillar D10T Track Dozers and 2 x Caterpillar 16M Graders.

Jason Fischer – Maintenance Coordinator at KCGM said; *"We've been fitting the SafeBoarder Retractable Access Systems for approximately 5 years and the safety features of these systems allow ease of access and egress for our operators, they have proven to be a quality product with excellent reliability, ensuring our ongoing use of the SafeBoarder Retractable Access System"*.
